I graduated from the University of New Mexico with Master Degree of Architecture in 1998. Before I came to US, I have worked in Chinese Academy of Science for 9 years after I graduated from the Beijing Polytechnic University with Bachelor Degree of Architecture. I did a lot of building designs before doing bridge designs in Caltrans.

My wife is Wei Zhang, also working in Caltrans, and I have two lovely daughters, Grace and Amy. I like all kinds of sports, travel, art, and I like to fix things inside and outside of house. I love CCEA and CCCS to bring countless joyful moments and memories to me and my family.
